Subject: Bayou Corne Natural Gas Seep-Activities conducted on Thursday, August 23, 2012 between 1600 hrs to 2400 hrs and on Friday, August 24, 2012 between 0000 hrs to 0730 hrs

Activities Performed by EPA START personnel on Thursday, August 23, 2012 between 1600 hrs to 2400 hrs and on Friday, August 24, 2012 between 0000 hrs to 0730 hrs:

- 24/7 air monitoring/oversight was conducted at the drilling site. Duties include review of facility's real-time monitoring data with the facility/contractor personnel, review of alarm readings and also calibration and maintenance records for facility's air monitoring instruments, and hand-held monitoring at 9 monitoring points. Parameters monitored included CO, H₂S, VOCs, LEL, and O₂. All readings were below the low action levels and with normal O₂ readings. Monitoring was conducted using the MultiRae. During the 1600 hrs to 2400 hrs shift on August 23, 2012, the hand-held monitoring at the 9 monitoring points was limited to 3 rounds due to heavy rain from approximately 1630 hrs to 1830 hrs. Between 0000 hrs to 0730 hrs on August 23, 2012, the hand-held monitoring at the 9 monitoring points was limited to 3 rounds and a portion of the 4th round due to on-site traffic.
- No additional problems or issues were encountered.
